

Tuesday, March 24, 2020

Dear Community Members of Delta County:

As of today, March 24, 2020 at 2:15pm, our local Public Health Department has issued the following information:

- To date in Delta County, Public Health has submitted 24 specimens to the state lab for testing, 10 were negative for COVID-19, and 14 are pending.
- Several commercial and private labs are able to test COVID-19 specimens now, so there may be more Delta County residents with pending tests than are aware of at this point.
- Public Health encourages providers to submit information to Public Health, even when they are using a private lab.

Please note that these numbers can change at any time as test results are being processed continually. These numbers only reflect accurate information as to the date and time of this briefing.
