

Tuesday, March 31, 2020

Dear Community Members of Delta County:

As of today, March 31, 2020 at 11:15am, Public Health Delta/Menominee Counties has issued the following information:

- To date in Delta County, Public Health is aware of 57 specimens submitted for testing, 27 were negative for COVID-19, 1 positive for COVID-19, and 29 are pending.
- Several commercial and private labs are able to test COVID-19 specimens now, so there may be more Delta County residents with pending tests than are aware of at this point.
- Public Health encourages providers to submit information to Public Health, even when they are using a private lab.

Please note that these numbers can change at any time as test results are being processed continually. These numbers only reflect accurate information as to the date and time of this briefing.
